The above site was inspected by me on 11.07.2024, In regard to
issuance of NOC. River side to complete the reconnaissance survey the
left edge of the river (i.e., the edge of the proposed road) has to be
identified and marked by driving boundary pegs in 100 metre interval
along the whole 8 Km stretch of the proposed road. The proposed road
alignment has to levelled, so that a four wheel drive vehicle can be
driven along the entire stretch to enable WRD officials to understand the
road alignment with respect to the river alignment.

After completing this preliminary arrangement, the status may be
intimated to this office to pursue the cause.

Recently this department has received guidelines to be followed to
issue NOC. The Health status of the Water Bodies are to preserved. The
NOC guidelines is communicated herewith for adherence.
